

TOO MUCH TECHNOLOGY. NOT ENOUGH INTELLIGENCE.

Netsocs turns disconnected systems into a real-time decision engine.

THE PROBLEM

Systems don't communicate

Data is not contextualized

Operators make slow decisions

80%

Automation projects that fail due to disconnected systems (MuleSoft)

FROM ALERTS TO DECISIONS

Netsocs adds context, intelligence and automation to every event.

WITHOUT NETSOCS

Silos. Manual processes. Delays. Higher risk.

WITH NETSOCS

**CORRELATE
EVERYTHING**

**UNDERSTAND
THE CONTEXT**

**ACT
IN REAL TIME**

THE MISSING OPERATIONAL LAYER,

You don't need more systems.
You need them to work as one.

- Too many systems
- Too much data
- Too little

2x

performance improvement
with connected operations
(Accenture)

-50%

response time
with automation
(Deloitte)

70%

of companies that fail to
automate will fall behind
(Gartner / Forbes)

BUILT FOR EVERY KEY PLAYER

INTEGRATORS

Higher project value
and real market
differentiation.

MANUFACTURERS

Their systems now
work together seamlessly,
increasing adoption.

MONITORING COMPANIES

Less noise, fewer operators,
more automation, and
higher margins.
